PHILLIP FLEISCHMANN: First name is Phillip,

552264

17 P-h-i-l-l-i-p, last name is Fleischmann,

18 F-l-e-i-s-c-h-m-a-n-n.

19 I'm going to keep my little bit brief and

20 short.

21 A couple of things to point out. As far as

22 nuclear power plants, Nevada did not benefit in any way

23 from those that I can see. We did not benefit from the

24 land sales, we did not benefit from the construction and

25 labor that went into building these plants, we do not

52

1 benefit from their operation -- of course, people are

2 employed there -- and we do not benefit from the power

3 generated.

4 Now, I'm afraid that the people that voted

5 for all these things are afraid of what they call the

6 NIMBY syndrome, not in my backyard. Now, I'm sure for

7 this to be placed, the general public had to vote on it.

8 Well, as I see it, it should be a package deal. If you

9 produce or construct a plant that produces one of the

10 most toxic wastes known to man, then you should have to

11 deal with that waste product. It's a package deal.

12 Now, everything coming over here, they say,

552264

13 well, it's in a containment system. Well, I see the  
14 containment system as being either yes or no. Is it  
15 really going to contain this 100 percent? Yes? No  
16 problem, keep it; you created it, you keep it. Is there  
17 a chance that it's going to leak? Well, that may be, and  
18 if that's the case, definitely keep it, I don't want it  
19 in my backyard either. We didn't produce it. We don't  
20 want it. It should be a package deal.

21 And in closing, a couple closing comments. I  
22 think those who approve the construction plans to these  
23 plants, they should have to deal with the waste products,  
24 not Nevadans, and anyone voting for the dumps is  
25 definitely not for Nevada. Thank you.
